ZEN
(INDICA)

This carefully selected cultivar smells of chocolate, coffee, and lemon before ignition. After lighting, it lingers with a scent that's difficult to find elsewhere.

On the inhale a chocolaty flavor comes through, accompanied by a smooth creaminess that makes you want another puff. Beneath the chocolate you can find hints of fruit and coffee, leading to an overall complex yet satisfying flavor profile.

Cappuccino is a well rounded indica, leaving the user feeling rested and relaxed after use. Giggles, along with a chance of arousal, have been noted by consumers as well. Sampling larger quantities of Cappuccino may lead to drowsiness, so take carefully!

Note: "Cappuccino" is a common name for cannabis, used by at least 3 different breeders – all with different lineage. This is not to be confused with the Cookie Fam Cappuccino (Espresso x 4516) or the AMS (Black Domina x White Widow) versions. Also not to be confused with "Cappachino", similar sounding name with slightly different spelling
