CEREBRAL

## STRAIN

THRIVE  
(SATIVA)

Think sweet strawberries and pine tar, this cultivar smells amazing!

With notes of strawberries, kush, citrus, and hints of pine, this beauty has a hard to describe euphoric flavor that lasts well after the exhale

Although you may find some write ups of this cultivar as an indica, this special in-house pheno has more of an uplifting sativa effect. If not over indulged, this is another fun feeling cultivar that allows you to get the chores done and lists checked off with a smile. Have a little too much and prepare to be slightly confused for a while, a warning to the novice end user....
